

Caring for your Breast Health

May you continue to be nurtured in the coming months!

Each year as Breast Cancer Awareness Month approaches in October, we at *The Thermography Center* begin to contemplate how we can better serve you - - our clients and your families.

I love that there is a special month that illuminates (and honors) the need to increase awareness about cancer. I also feel excited about all the ways in which women and men gather together to empower and support each other in their successes and challenges regarding the experience of healing (in all the myriad definitions we might have of what "healing" means) from cancer. And, I also think we can do more to expand our understanding and expectations of, and contributions to, the field of holistic cancer healing, research and prevention.

Of course awareness alone will not treat or cure cancer. We need tangible action plans to fund research and comprehensive wellness plans for treatment. We also need safe, radiation-free, low cost options for early screening indicators for cancer; we need tools, assessments and tests which help us to 'see' our bodies in such a way that we can offer proactive health strategies and support before disease occurs.

Please have a look at the following information regarding our discounted screenings for the month of October; also note our continued collaboration with the United Breast Cancer Scholarship Fund, and how to apply for a breast screening scholarship for up to \$150.00!!

In addition there is also financial help in the form of a holistic care scholarship. And finally we have many ways for you and your loved ones to give back and get informed.

Can't wait to support your wellness journey!

Low Cost Breast Screening through:

****The United Breast Cancer Foundation
and***

****The Thermography Center***

Hurry and apply!

Many of you have benefited greatly from the scholarships offered through *The United Breast Cancer Foundation*. Those of you who don't need a scholarship to help pay for the cost of your breast screening or full body scan may still want to share this helpful grant with others who are in financial need.

This is VERY exciting news! Because it means that very few will be turned away due to financial need or hardship.

Funds awarded may also be used toward the Breast Screening portion of a Full Body Scan. If awarded a full scholarship (\$150), this means that we can provide, during the month of October, a breast screening for as little as \$57.00 and a Full Body Scan for as little as \$255.00. If clients choose to pay cash, the savings are even greater.

Ask for details for paying with cash discounts when you call to schedule your breast screening or full body scan.

The way it works:

Individuals may apply by accessing the application directly through *The United Breast Cancer Foundation's* website, www.ubcf.org or by visiting our [FAQ here](#). Detailed instructions are on the website. There is a \$5.00 fee to access the application. Once you receive an email reply from UBCF you may then make an appointment with *The Thermography Center* by scheduling on our website or calling us: 805.560.7602 or 310.871.5647. It is that simple!

It has always been *The Thermography Center's* goal to provide affordable and safe screening for early indications of breast disease. *The Thermography Center*, in accordance with the *United Breast Cancer Foundation*, provides a wider range of access to all women (and men) for preventative breast screenings. With each breast screening clients receive complimentary health tips and further options for the natural prevention and reversal of disease.

**Please continue to share the good news
with all your friends and family!!!**

Special Offers - Our Give Back!

10% off All Screenings During the Month of October!!!

Breast Screening Discounted from \$230 to only \$207!

Full Body Scans, which include a breast screening discounted from \$450 to \$405

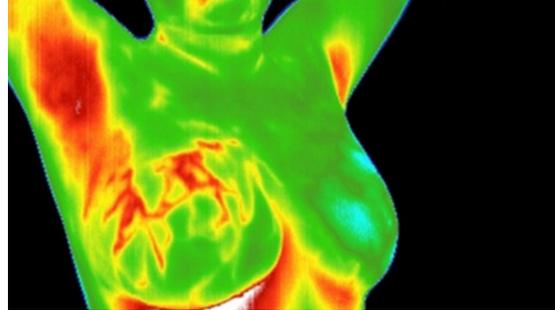

And, don't forget, if you pay cash, we offer further discounts!
\$10 off the cost of a breast screening & \$20.00 off the cost of a full body scan! Now that is Giving Back!!!

What is Breast Thermography?

Breast Thermography can screen for

early indications of disease in the breast. You can then halt & reverse symptoms holistically before they become life threatening.

Ways for you to Give Back!

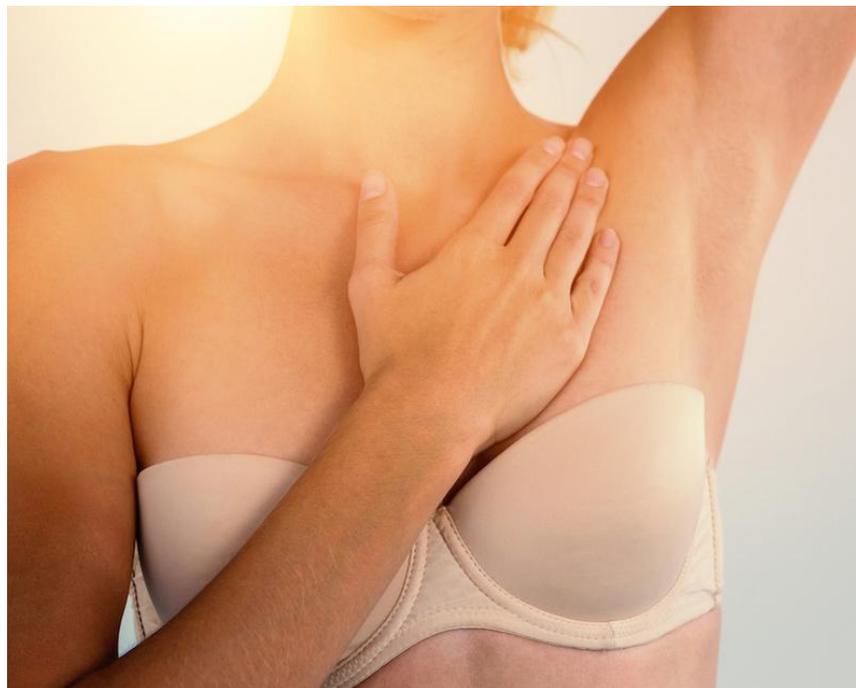

[Women's Retreats to Battle Cancer - Video](#)

Wondering how you can give back? Donate to InnCourage Cancer Retreat. In December, the Lavender Inn in Ojai will host a 3 day, 2 night retreat for under-served women undergoing treatment for cancer. These days offer a respite from the daily challenges of healing from cancer along with hope of forming a strong fellowship with others walking a similar path.

To support InnCourage, contact Victoria Chandler at the Ventura County Medical Resource Foundation at 805-485-8050, ext. 11

Good News in the World of Breast Health!

Photodynamic Immunotherapy - An alternative to Chemotherapy.

Designed to harness the energy of a singlet oxygen (in simple terms, a wavelength of light exposed to oxygen molecule) to defeat cancer cells and amplify immune health. I think this is an interesting new approach that makes a lot of sense. Many of us by now understand that cancer is anaerobic and can not survive in an oxygenated environment so both targeted immuno oxygen therapy, ozone and hyperbaric oxygen chamber therapies could be very helpful towards the treatment of cancer.

Did you know You could Receive a Holistic Healthcare Scholarship?

If you or a loved one you know needs financial support for their alternative or supplemental healthcare needs, this scholarship could be very helpful. Please click [here](#) for more information and to learn how to apply.

Don't Forget!

Detox Regularly through juicing, coffee enemas, and sweating often!

Don't Forget your monthly Self Breast Exam!

And, most importantly, Don't Forget to love your breasts, your body, your life and each other!

We want to say THANK YOU to everyone for their positive feedback regarding our new website...We think it is extra beautiful too!!!
